**Details:**
The Physicians at KentuckyOne are creating a brand-new Scribe Program for their clinics, including internal medicine, family medicine, orthopedics, GI, and cardiology. They have contracted with our company ScribeAmerica to hire and train their Physician Scribes. Accordingly we are recruiting outstanding students interested in careers in medicine to begin staffing their program. Our company is the nation’s largest professional scribe training and management company in the United States and present in over 500 healthcare facilities, in 41 states and employing more than 4300 scribes. We are looking to recruit people to become part of our team.

The job opportunity is called an “Outpatient Physician Scribe;” we act as personal assistants to the physician and perform all of their non-patient-care tasks. These include documentation, patient tracking, organization, and much more. We are looking for extremely motivated, sharp, and adaptable students who perform well in a fast-paced and high-energy environment. Because you will work one-on-one with a board certified physicians for the entirety of their shift you become intimately familiar with the specialty. Additionally you gain first-hand experience documenting exactly like a physician; a skill that is invaluable later for any career in health.

There is both classroom training and applied training live in the outpatient setting. Because of the rigors of training, all hours spent training are paid. Additionally, since I personally commit over 100 hours of training for each employee, there is verbal commitment of two years of work for part time employees and one year of work for full time employees. The training starts at $10 per hour. Additionally we are looking to hire a chief scribe to run the program at this hospital so career opportunities are available for noteworthy candidates.
