Job Descriptions for Academic Ministry Team Positions

High School Chemistry Teacher, High School Biology Teacher:
Christian applicants will be chosen based on their previous background in the area of science; on the degree of their subject matter expertise in the field of science and chemistry/biology; their ability to work closely and communicate successfully with individual students; and on the breadth and flexibility of their instructional strategies. The successful chemistry/biology teacher will be expected to use prescribed core content academic standards to directly engage and support individual students’ needs in order to gain mastery of the subject content. Advanced and remedial instruction will be an integral part of this ministry position, which allows the teacher to become comfortable with working as a part of a whole-school instructional team that directly promotes Christian Education for Time and Eternity.

High School Math Teacher:
Christian applicants will be chosen based on their previous mathematics background; on the degree of their subject matter expertise in the field of geometry; their ability to work closely and communicate successfully with individual students; and on the breadth and flexibility of their instructional strategies. The successful math teacher will be expected to use prescribed core content academic standards to directly engage and support individual students’ needs in order to gain mastery of the subject content. Advanced and remedial instruction will be an integral part of this ministry position, which allows the teacher to become comfortable with working as a part of a whole-school instructional team that directly promotes Christian Education for Time and Eternity.
