

University of the Cumberlands
Department of Information Technology
Microsoft Vista Dialup Network Setup

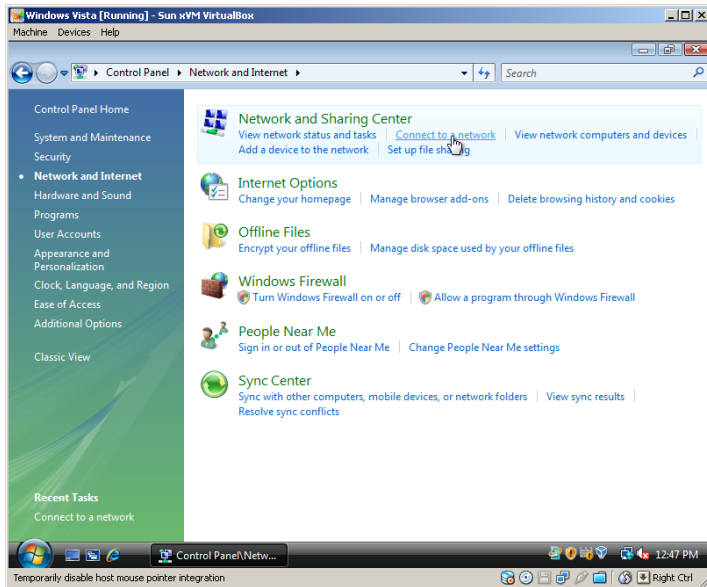

1. Click Start then click Control Panel.

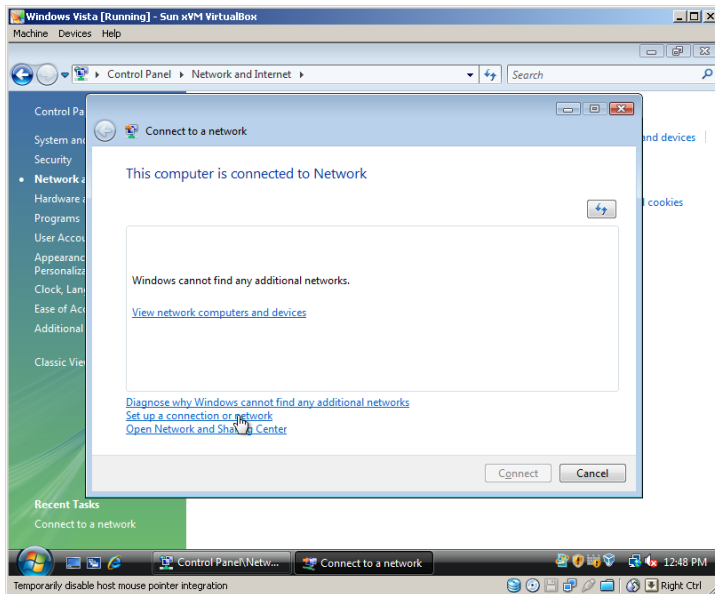

2. Click on Network and Internet

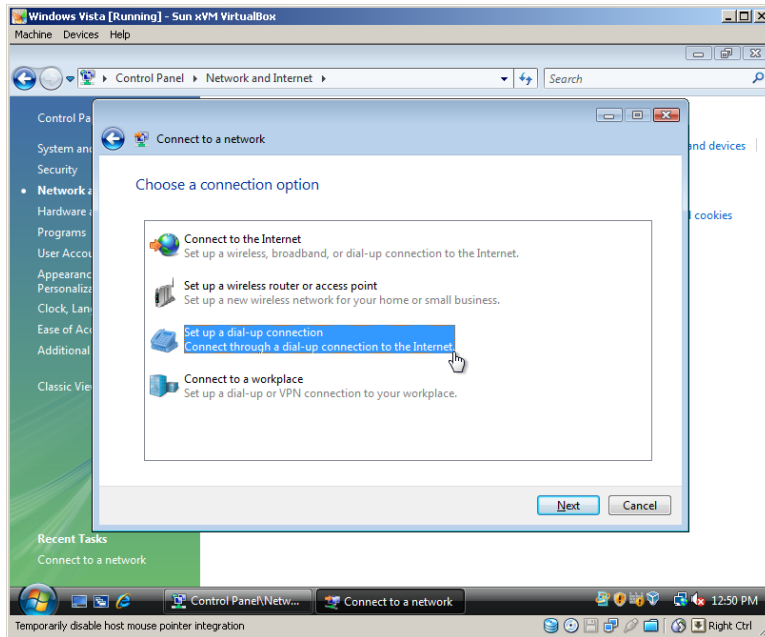

3. Click on Connect to a Network

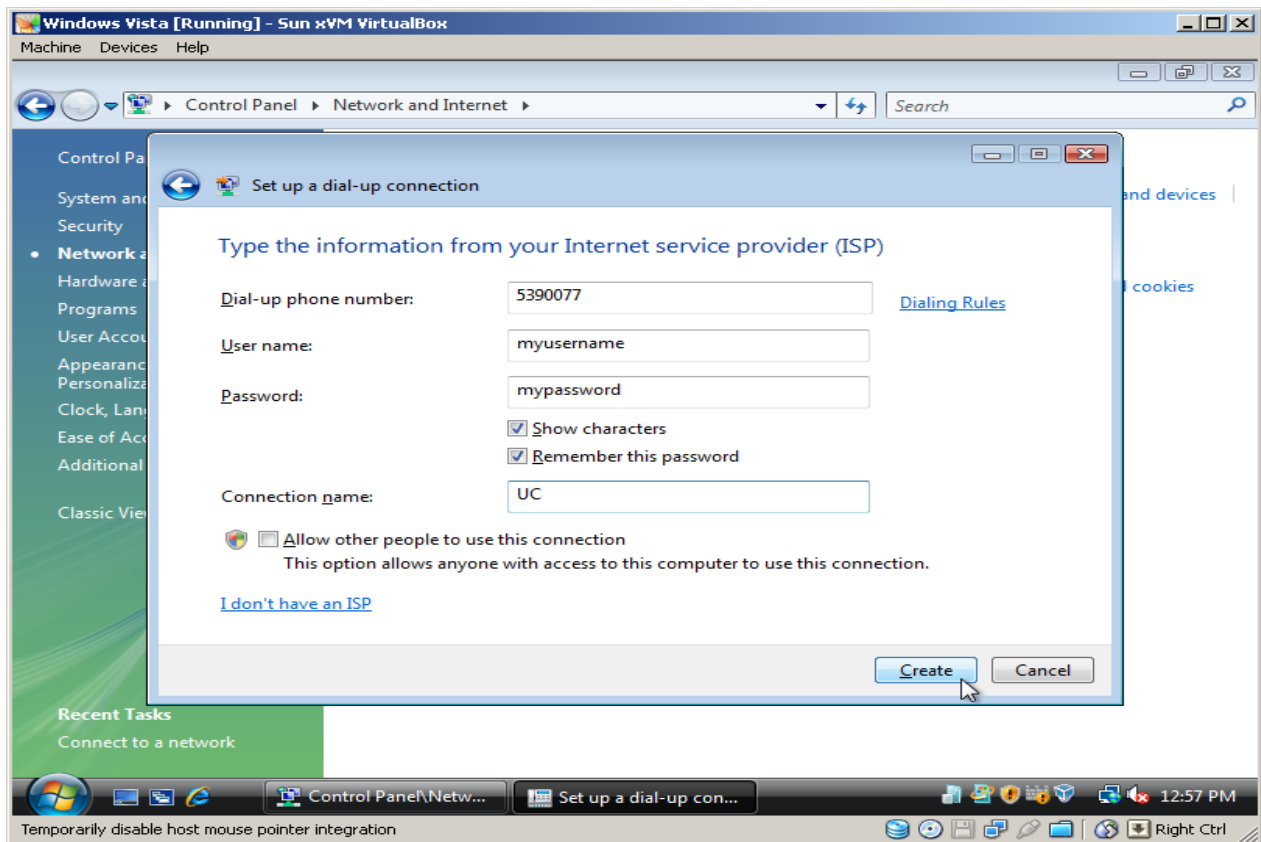

4. Click on Set up a Connection or Network

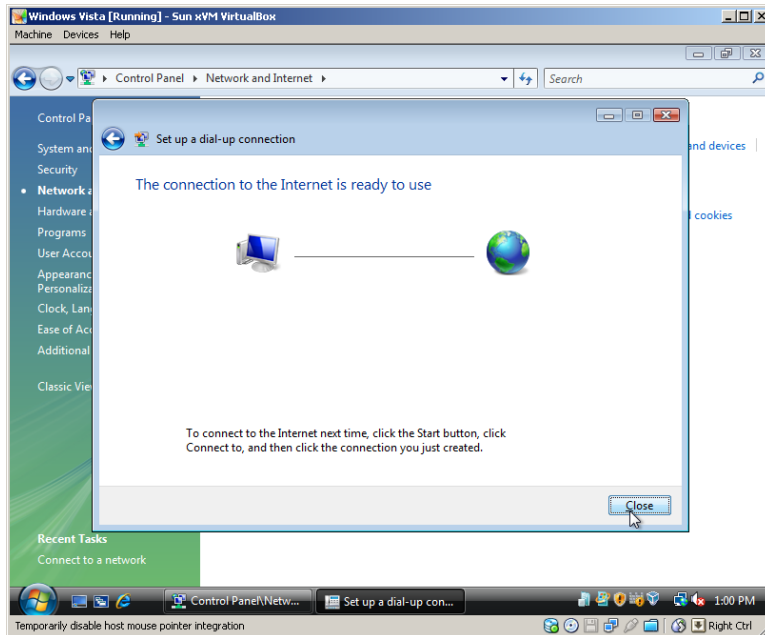

5. Select Set up a Dial-up Connection and click Next

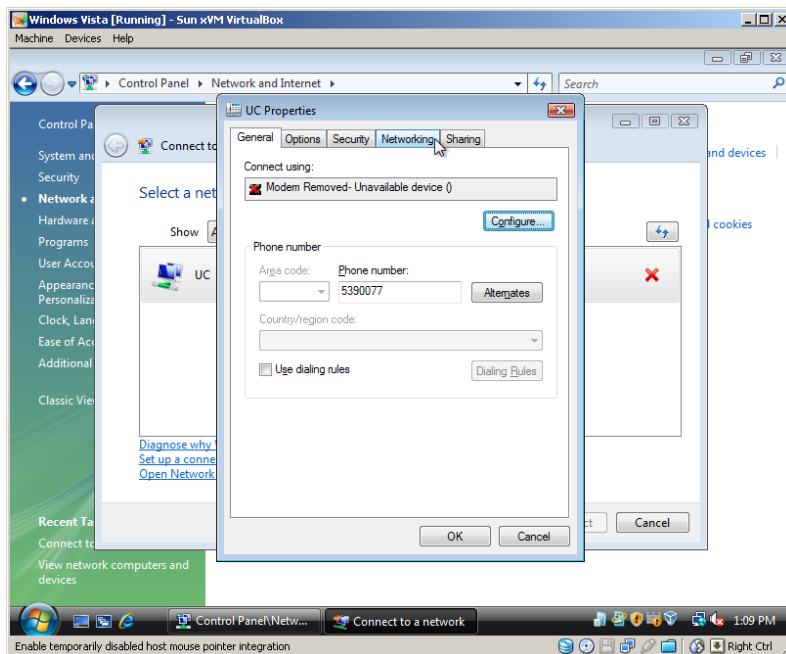

6. Enter the information as shown on this screen. Use your University domain and email username and password. After you fill in the information, click Create.

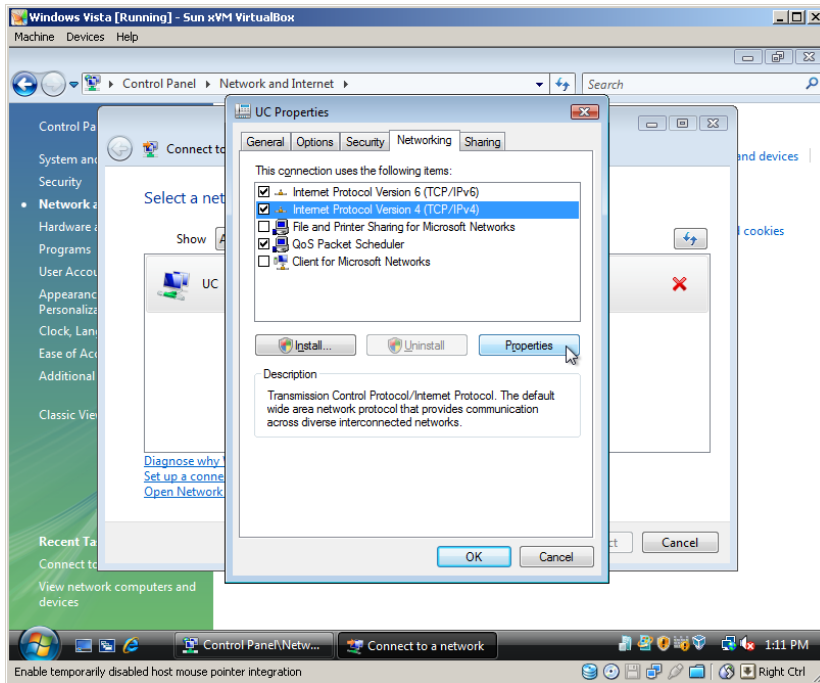

7. You are now finished with the initial setup, but there are a few more things to do before setup is complete. Click Close on the finish screen shown below.

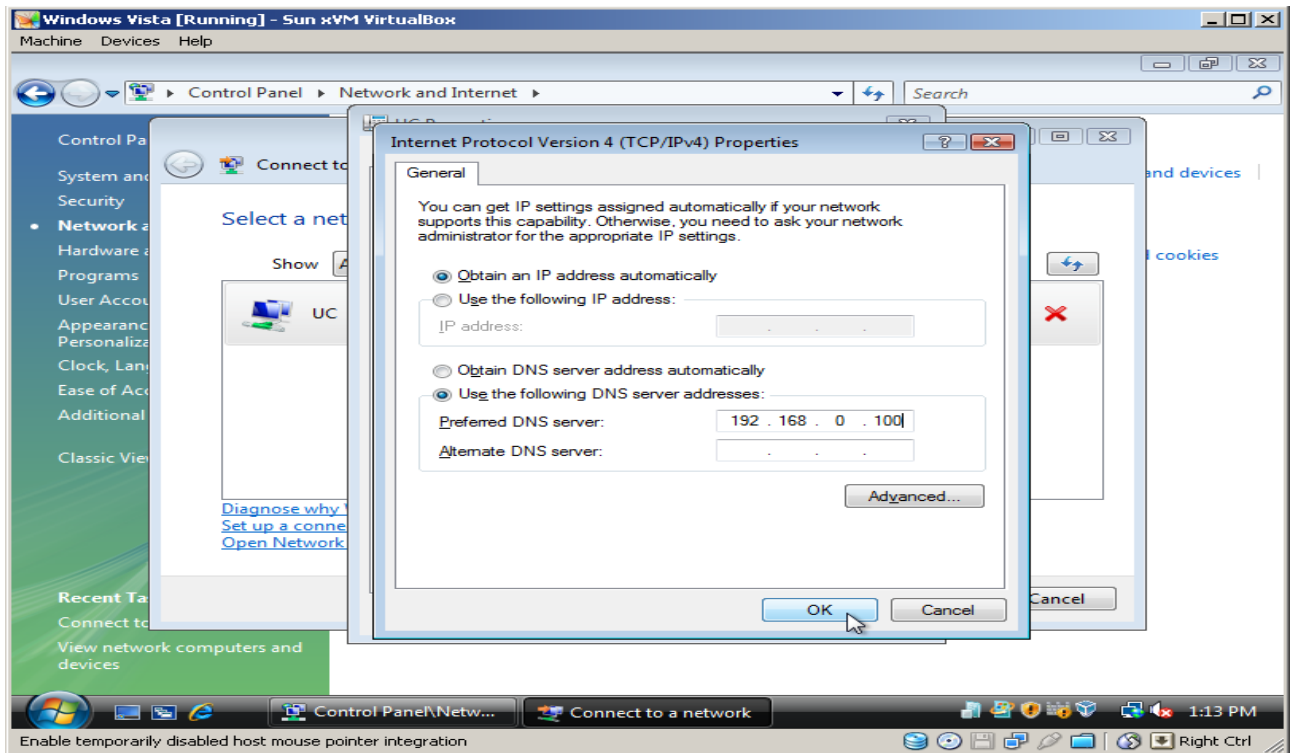

8. Follow steps 1-3 to see the Connect to a Network screen.
9. Right-click on the UC connection that you created earlier and click Properties. Then select the Networking Tab.

10. Highlight Internet Protocol Version 4 in the list and click Properties.

11. Enter the information as shown on this screen. Then click OK.

12. Click OK on the Properties screen. You are now ready to connect to UC's network via a dialup modem. Click on the UC connection on the Connect to a Network screen and click Connect.
